

// Project Experience  
**Kipoi EW Expansion**

Location: Democratic Republic of the Congo (DRC)  
Scope: Engineering, Procurement & Construction (EPC)  
Completion: 2016

SENET provided Engineering, procurement and construction services for the Kipoi EW Expansion project on turnkey basis. The expansion of the electrowinning increased the Copper production from 25, 000 t/a to 32,500 t/a of LME Grade copper cathode.

SENET design of the expansion consisted of the design and installation of 14 additional EW Cells along with the expansion of the Electrowinning tankhouse and all auxiliary services.

SENET's regional experience ensured the successful commissioning of the plant with minimal shutdown periods.
