

// Project Experience

Cerro Mojon

Location: Nicaragua
Scope: Engineering, Procurement & Construction (EPC)
Completion: 1997

This was a complete Heap Leach Project including ROM tip, Crushing, In-plant & Overland conveyors and Heap Leach Stacking Equipment, incorporating SENET's proprietary equipment for Heap Leach Stacking.

The project was carried out in a nine month total project duration, with SENET being responsible for all design, supply, manufacture, shipping, and construction supervision.
