

// Project Experience

Satellite Goldfields

Location: Ghana

Scope: Engineering, Procurement & Commissioning (EPC)

Completion: 1999

SENET supplied six 30 m long x 900 mm wide skid-mounted grasshopper conveyors sized for 650 t/h of ore with a bulk density of 1.6 t/m³, and installed three 900 mm wide overland conveyors with a combined length of 2 km to feed the heap leach pad extensions for the life of mine.

The grasshopper conveyors supplied on this project form part of SENET's in-house proprietary equipment offerings to clients.
